

Franklin Academy: Boynton Beach  
Algebra Honors: Ms. Johnson  
2017-2018

Dear Parents/Guardians,

I want to take this opportunity to express my excitement about working with your child this year! I am looking forward to a very productive and challenging year here at Franklin Academy.

Our Algebra Honors class will be covering topics ranging from Solving and Graphing Linear Equations to Data Analysis and Probability. I am confident that you will be impressed with your child's growth in cognitive math skills this year, and I look forward to guiding each of my students in achieving their personal best.

For these reasons, I have high expectations of my students - This class will be very rigorous. Parents and students should expect homework to be assigned often. Any missed work will require a doctor's note or documentation in order to receive full credit. Additionally, it is the student's responsibility to acquire and complete any missed assignments due to absences.

As many new lessons will require a full understanding of prior skills taught, I encourage my students to feel comfortable in immediately communicating with me if they feel discouraged, left behind, or as though they are having difficulty mastering a skill. Parents, please reinforce with your children the importance of asking for help - I am happy to work with your child on a more individualized basis if needed.

This is an honors class, and your child can potentially earn high school credit. Thus, we will be moving at a rapid pace. Get ready for a fun and stimulating year!

Sincerely,

Sarah Johnson
