

Khan Academy Geometry EOC Interactive Study Guide

Quarter 4 Project (200 Points)

Due May 13th at 10:59PM

All Geometry students are to complete all 8 Unit Tests and 5 Quizzes that have been assigned to them on khanacademy.org/coaches. Students must earn an 80% or higher to earn credit on each Unit Test and Quiz. I've explained to each class that these assessments can be taken and retaken as many times as needed to achieve the 80%. As long as they've reached their goal of 80% on each assessment they will receive a 100% for their project grade. ****Please keep in mind** This is quite a large project that is intended to be completed over the span of one entire month.** I will do my very best to no longer assign extended learning for the remainder of the school year. This is due to the fact that Geometry students should be on Khan Academy every day completing their project. If students log in each day until it's due, they will need to complete approximately 4.5 problems a day.

Please remember, these assessments will each earn a score of either full credit (80% or higher) or no credit (79% or lower.) This is due to the fact that each student will have an unlimited amount of attempts to reach their goal of 80%. Students will not be eligible for extra credit until they have scored an 80% or higher on their chosen 12 Unit Tests.

QUARTER 4 EXTRA CREDIT

I will be offering students who complete MORE than I've required, extra classwork points. **Students will not be eligible for extra points until they've scored an 80% on all 8 Unit Tests and 5 Quizzes.** If students wish, they may complete any/all quizzes for an additional 5 classwork points each. I know our class has a lot of over achievers who will be taking advantage of this opportunity. I will assign the extra credit quizzes on an individual basis **after** the student has completed his/her required 8 Unit Tests and 5 quizzes. This is a HUGE opportunity for those students who have been inquiring about extra credit assignments.
